## INTRODUCING AUNT LEA

AUNT LEA (SPORT OF HIGH FINANCE)

HEIGHT OF SPIKE IN THE FIELD 64 inches

NUMBER OF BLOOMS OPEN 6, and up to 6 showing color

NUMBER OF BUDS 20

WIDTH OF BLOOM 6 to 6½"

HEIGHT OF SPIKE WHEN CUT 48"

HEALTH—(foliage, bulb, and propagation) EXCELLENT, BLOOMS  
MID-SEASON

COLOR—A very clear light orange with a cream white throat. We have never seen this flower flake or show any other marking except that under a light it throws off a slight golden tint at the edge of the petals. We believe this to be a really worthwhile addition to the orange class. This is in the 520 class.

PRICES EACH: LARGE \$2.00; MEDIUM \$1.00; SMALL .50;

Bulblets 3-.50

WRITE FOR GROWERS UNIT PRICES

## GREETINGS, FRIENDS:

Thanks again for past favors; they were deeply appreciated. At this time we would like to make a few comments on some of the varieties grown by us this past season.

Ankara, with its tall, wiry spike; Mansoer; Grand Monarch; Uncle Tom; and Black Panther; these were very much admired. All are in the dark shades and all are very good cut flowers.

Light shades of red that were also very much admired and that are good flowers were: Dieppe, Gracie Allen, Intruder, Johan Van Konynenburg, Kardinal Spellman, and Harry Hopkins. We consider excellent.

We have added a number of yellows to our stock the past few seasons. Among these are: Debutante, Gold Rod, Mother Kadel, Nugget, Orion, Primrose Princess, and Yellow Herald. We have just named a few here but there are many others.

Now in the orchids or lavender shade there is Century which looks good and is some what of the shade of Lavender Prince; Gay Lady; Lavender Prince; Patrician, somewhat on the style of the clearest Minuett. Sibony and Elizabeth the Queen in the light lavender shades were very much admired.

In the whites and cream-whites of course Leading Lady, without question, is still tops with us; although Canopus and Sprindrift are somewhat larger.

In the different shades of orange, we have added a number of American and foreign varieties. We believe Aunt Lea, which is a sport of High Finance, to be outstanding in this shade. Other new varieties in this class are: Daphne, Daisy Mae, Picton, Orange-Ade, and Evening Bells.

In the pink shades, first of all Leeuwenhorst; Lovely Lady; Miss Wisconsin, rose-pink; Rosea, Rosa, and Rose Delight also were very much admired. Sophia, with its beautiful carmine throat; and W. J. Darker.

Odd colors, such as Misty Dawn, Uhu, Buckeye Bronze, and High Finance were very much admired.

Among the pastel shades, there were Deborah Sampson, General Eisenhower, Lipstick, Odette Sansom.

These are just a few that come to my mind at this time. There are many others that were outstanding and perhaps better than those I have mentioned.

We are going to offer a few Do's and Don'ts for your Glad Garden.

First: open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable cellar, or a place where it is not too warm or too cold. After your soil has been prepared in the Spring of the year, furrow out your rows and scatter in the bottom of the trench, a good Commercial fertilizer such as 4-12-4, 4-8-10, or 5-10-10 or any other good Commercial fertilizer, that is available in your community. Mix well with the soil, setting large bulbs about five inches deep, and five inches apart, other size bulbs in proportion, with the smallest about two inches deep, and two inches apart. All Glad bulbs must be dipped before planting, in order to kill any thrips or disease that may be on them. We use Lysol. One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before

planting. Any water container will do. Do not plant near building, heavy rooted plants such as trees, etc. Cultivate frequently enough to keep soil loose, and free from weeds, not too deep, and after every heavy rain or watering. Spraying and dusting for thrip (adults are small black insects about 1/16 of an inch long) we have used the two following formulas:

DDT Spray—2 rounded teaspoonfuls DDT (50%) wettable; 1 teaspoonful Dreft; 2 gallons water, mix and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. Not as effective as spraying but very much faster.

Dust once in about every 10 days after foliage is 8 or 10 inches high. Do not use DDT dust on blooms as it will spot.

A good idea is to sprinkle bulbs with 5% DDT dust while bulbs are in storage.

When cutting blooms be sure and leave at least four leaves so as to mature the bulb. Bulbs should be dug as soon as the foliage starts to become yellow or after a heavy frost. Dig bulbs when soil is dry if possible. Using a digging fork, lift bulbs by the foliage. Cut tops off close to the bulbs shaking out loose dirt. Use shallow wooden trays or clean paper bags, marking each variety. Curing and cleaning bulbs; remove bulbs to warm dry place where there is a good circulation of air. After a period of three or four weeks, or when bulbs are properly dried, old bulb is easily broken away from the base of the new bulb. Be sure and leave husk on bulb, as this is a protection in storing. Ideal storage temperature is between 34 and 45 degrees F, or in a good vegetable cellar.

Terms of sale: Cash with order, or twenty-five percent, the rest C.O.D. No order for less than two dollars and no item for less than ten cents please. We have made our prices low enough so as to eliminate all confusing discounts. We are very liberal with our overcounts. All retail orders will be sent prepaid. If out of size wanted, we will ship next size, giving equal or better value.

These are State inspected bulbs. We try to and observe the fact that making friends is very essential to our business.

Sincerely yours,

TAYLOR GARDENS
